Atty Dkt No.: 46449.00002 Amendment Under 37 C.F.R. § 1.111

U.S. Application No.: 10/614,130

**AMENDMENTS TO THE CLAIMS:** 

1. (Original) A seat comprising:

a pad assembly having a main portion and side portions, the main portion interposed

between the side portions, the side portions including boundary-portion pulling slots wherein

boundary-portion insert wires are disposed along bottom portions of said boundary-portion

pulling slots, and the main portion including a main-portion pulling slot disposed

substantially perpendicular to the boundary-portion pulling slots;

a cover assembly covering a surface of the pad assembly, the cover assembly

including boundary-portion pulling bags pulled into the boundary-portion pulling slots

respectively and a main-portion pulling bag pulled into the main-portion pulling slot, wherein

boundary-portion end wires are inserted into said boundary-portion pulling bags and fixed to

said boundary-portion insert wires respectively; and

a main-portion end wire inserted into the main-portion pulling bag, the main-portion

end wire having opposite end portions bent, the main-portion end wire being placed into the

main-portion pulling slot with the bent opposite end portions linked with the boundary-

portion end wires respectively.

2. (Original) The seat according to Claim 1, wherein each of said boundary-portion

end wires inserted into said boundary-portion pulling bags is a single wire.

3. (Original) The seat according to Claim 1, wherein said main-portion end wire

hangs said main-portion pulling bag into said main-portion pulling slot by bending reaction

force generated by bending said opposite end portions of said main-portion end wire.

Amendment Under 37 C.F.R. § 1.111 Atty Dkt No.: 46449.00002

U.S. Application No.: 10/614,130

4. (Original) The seat according to claim 1, wherein said main-portion end wire is

made from an elastic material.

5. (Original) The seat according to claim 2, wherein said main-portion end wire is

made from an elastic material.

6. (Original) The seat according to claim 3, wherein said main-portion end wire is

made from an elastic material.

7. (Currently amended) The seat according to claim 1, wherein each of said

boundary potion boundary-portion end wires is formed from a single wire, wherein said bent

opposite end portions of said main-portion end wire are linked with intermediate portions of

said boundary-portion end wires respectively.

8. (Original) The seat according to claim 1, wherein said boundary-portion pulling

bags respectively have cut portions through which said intermediate portions of said.

boundary-portion end wires are exposed so as to be linked with said main-portion end wire.

9. (Original) The seat according to claim 1, wherein said boundary-portion insert

wires are made from a U-shaped single insert wire.

Amendment Under 37 C.F.R. § 1.111 Atty Dkt No.: 46449.00002

U.S. Application No.: 10/614,130

10. (Original) A seat comprising:

a pad assembly having a plurality of pulling slots extending in directions crossing one

another; and

a cover assembly having a plurality of pulling bags pulled into said pulling slots

correspondingly and respectively so that said cover assembly covers a surface of said pad

assembly;

wherein at least one insert wire is embedded in bottom portions of said pulling slots

except at least one pulling slot, while end wires are inserted into all of said pulling bags

respectively; and

wherein opposite end portions of said end wire inserted into said pulling bag pulled

into said at least one pulling slot are bent, said bent opposite end portions are linked with said

end wires of said pulling bags pulled into said pulling slots other than said at least one pulling

slot, and when said end wire with said bent opposite end portions linked is forced into said at

least one pulling slot, said pulling bag having said end wire inserted thereto is pulled into said

at least one pulling slot.

11. (Original) The seat according to claim 10, wherein said at least one insert wire is

formed from a U-shaped single wire.

12. (Original) The seat according to claim 10, wherein said at least one insert wire

comprises two insert wires.

Amendment Under 37 C.F.R. § 1.111 Atty Dkt No.: 46449.00002

U.S. Application No.: 10/614,130

13. (New) A seat comprising:

a pad assembly having a main portion and side portions, the main portion interposed

between the side portions, the side portions including boundary-portion pulling slots wherein

boundary-portion insert wires are disposed along bottom portions of said boundary-portion

pulling slots, and the main portion including a main-portion pulling slot disposed

substantially perpendicular to the boundary-portion pulling slots;

a cover assembly covering a surface of the pad assembly, the cover assembly

including boundary-portion pulling bags pulled into the boundary-portion pulling slots

respectively and a main-portion pulling bag pulled into the main-portion pulling slot, said

boundary-portion pulling bags having cut portions at intermediate portions thereof, wherein

boundary-portion end wires are inserted into said boundary-portion pulling bags and fixed to

said boundary-portion insert wires respectively, and said boundary-portion end wires being

exposed at said cut portions thereof; and

a main-portion end wire inserted into the main-portion pulling bag, the main-portion

end wire having opposite end portions bent, the main-portion end wire being placed into the

main-portion pulling slot with the bent opposite end portions linked with the boundary-

portion end wires respectively.
